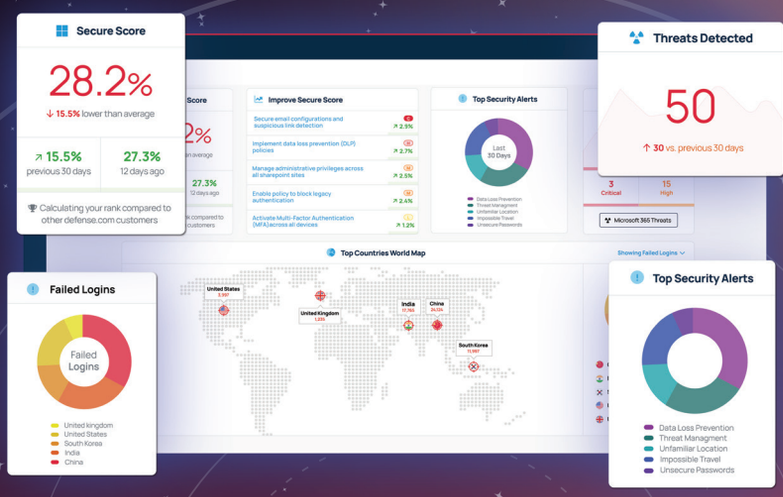
DEFENSE.COM™

Detect threats.
Stop cyber attacks.

Defense.com is an XDR platform that helps you easily detect and respond to cyber threats across all areas of your network.



Defense.com ingests and correlates security data from any source into a single platform, making it easy for you to identify, prioritize and remediate threats. Defense.com combines advanced monitoring technology with expert SOC analysts to provide 24/7 threat detection and drastically reduced remediation times.

Collect

Ingest logs from all sources including applications, endpoints, servers, network devices and cloud systems.

Detect

Never miss a genuine threat with an advanced detection engine and a team of SOC analysts available 24/7.

Respond

Stop threats and protect your business with clear remediation actions for each security event.

Defense.com Platform

Strengthen your security and stop cyber attacks from a single platform

- Threat Dashboard
- Microsoft 365

Microsoft 365

Enhance your Microsoft 365 security

Integrate your account to centralise alerts and streamline threat management:

- **Centralised threat alerts** across platforms into one prioritised dashboard
- **Take immediate action** by disabling users without leaving Defense.com
- **Boost your Microsoft Secure Score** with clear, actionable advice

Automated Actions

Stop threats in their tracks

When a threat is detected, Defense.com's automated actions immediately kicks into effect by following a number of pre-set steps - like isolating impacted devices, blocking risky network addresses and pausing suspicious user sessions.

This rapid, real-time response helps:

- **Minimise damage** before it causes serious harm
- Keep your team **one step ahead** of potential threats
- Enhance your overall business resilience

Introducing

ORBITAL

The lightweight endpoint agent that allows you to:

Instantly isolate compromised devices
to stop threats in their tracks

Automate compliance checks
for Cyber Essentials & other standards

Track assets in real-time
no more manual inventory

Remotely uninstall agents
when decommissioning device

Integrate with all your existing tech

...and many more tools ready to connect!
