

Threat Intelligence

Industry-Focused Threat Intelligence for Your Sector

See only the threats targeting your industry — not the noise from every attack worldwide

THE CHALLENGE

- Generic threat feeds with irrelevant alerts
 - Alert fatigue from global threat noise
- No visibility into sector-specific threat actors
 - Difficulty prioritizing industry-relevant risks

Sector-Based Intelligence

Pre-filtered threat data for 11 industries including healthcare, finance, manufacturing

Real-Time Threat Levels

Color-coded threat status (Green→Red) calculated from recent high-severity threats

Ransomware Tracking

Monitor 313+ ransomware groups with victim data, TTPs, and targeting patterns

CVE Intelligence

Aggregated vulnerability data from CIRCL, NVD, and CISA with exploit status

Security News Feed

Curated alerts from CISA, NCSC, Krebs, Dark Reading, and 9 more sources

Community Intel

Submit and validate IOCs with crowd-sourced voting and confidence scoring

Intelligence Capabilities

Monitor	Analyze	Act
- Threats by industry sector - Active ransomware groups - Exploited vulnerabilities - Threat actor campaigns - Global threat level changes	- Threat trends over time - MITRE ATT&CK patterns - Malware family activity - IOC correlation - Sector targeting patterns	- Prioritize sector-relevant risks - Export IOCs for blocking - Share intel with team - Track remediation status - Configure alert thresholds

How It Works

1

Select Sector

Choose your industry

→

2

View Dashboard

See filtered threats

→

3

Monitor Threats

Real-time threat levels

→

4

Take Action

Export IOCs & prioritize

COVERAGE AT A GLANCE

Threat Actors Tracked	500+
Ransomware Groups Monitored	313+
IOCs in Database	2.5M+
MITRE ATT&CK Techniques Mapped	200+

SUPPORTED SECTORS

-  **Critical Infrastructure** — Energy, Government, Healthcare
-  **Business Sectors** — Finance, Retail, Manufacturing
-  **Service Industries** — Technology, Education, Hospitality
